

University Majors Assessment of Potential
for
Right Brain Sample

Our choices, both personal and educational, are based on factors which either interest or motivate us as individuals. This report is a thorough analysis of those interests and motivations.

It is a *Reflection* of oneself at a given point in time.

Contemplate its contents carefully.

Use the information wisely.

And above all else,

“To thine own self, be true.”

- William Shakespeare

ABOUT THIS REPORT - Right Brain Sample

6.0 UNIVERSITY MAJORS ANALYSIS SECTION

The University Majors Assessment provides Best-Fit matching to 70 University Majors in 9 Categories.

6.1 UNIVERSITY MAJORS AREAS INDEX

The University Majors Assessment divides the world of University/College study into 9 majors areas.

- 6.1.01 Business and Related
- 6.1.02 Education
- 6.1.03 Engineering
- 6.1.04 Fine Arts
- 6.1.05 Liberal Arts
- 6.1.06 Medical and Related
- 6.1.07 Science and Mathematics
- 6.1.08 Social Science
- 6.1.09 Technology

6.2 UNIVERSITY MAJORS TITLES INDEX

Each of the University Majors Areas listed in the previous section has now become a heading (subsection) under which specific educational titles appear. Each subsection lists multiple titles in order of (M.I.) Motivational Importance.

- 6.2.01 Business and Related - 6 titles
- 6.2.02 Education - 5 titles
- 6.2.03 Engineering - 7 titles
- 6.2.04 Fine Arts - 9 titles
- 6.2.05 Liberal Arts - 10 titles
- 6.2.06 Medical and Related - 11 titles
- 6.2.07 Science and Mathematics - 10 titles
- 6.2.08 Social Science - 7 titles
- 6.2.09 Technology - 5 titles

THE RATING SYSTEM

Most sections of data are paired with two columns of numbers.

The first number indicates the level of motivation a person has for the associated text (Motivational Importance, labeled with M.I.).

Motivation at level 1 is Passionate (Dedication);

Motivation at level 2 is Strong;

Motivation at level 3 is Moderate;

Motivation at level 4 is Disinterest; and

Motivation at level 5 is Anti-Motivational (Avoidance).

All factors in this report are listed in order of Motivational Importance.

The second column is a percentile (%). It is indicative of the intensity one feels for the corresponding line of text (i.e., if a person has a 95th percentile rating for a given line of text, only 5 percent of our statistical database population would feel more driven relative to the corresponding text.).

It is as important to know what passionately motivates a person as it is to know what is, in fact, anti-motivational. Given this information, pay close attention to both top and bottom the ratings.

UNIVERSITY MAJORS TITLES INDEX - Right Brain Sample

M.I.-% 6.2.01 Business and Related

- 1 - 81% Marketing management.
- 1 - 78% Public administration.
- 2 - 59% Business administration.
