

One component of our process is the *SelfMaps* questionnaire that identifies personal preference and motivation. These characteristics drive the choice of vocation and occupation, in addition to communication, learning and relationships.

A complex analysis of your responses will create a Motivational Assessment of Personality (MAP™) that correlates these inherent drives with the world of work, study, and relationships.

The *SelfMaps* questionnaire can be completed in less than thirty minutes.

It is important to respond intuitively. Your first choice is the best choice. Do not over-analyze your response. Move along quickly.

It is not necessary for you to have the skills, training, or experience required for any selection, only the desire. Respond only on the basis of your preference for the statement.

Please read all three statements in each section below.

First, select and mark the **one** statement that you prefer the **Most (M)**.
Next, select and mark the **one** statement that you prefer the **Least (L)**.

Do not mark **Most (M)** and **Least (L)** for the same statement.

In the example below:

"Visit stores in a metropolitan shopping mall" was preferred the **Most**, and
"Hike through a national wilderness area" was preferred the **Least**.

Remember, there are no "right or wrong answers", only an identification of the your preferences.
